

GLOBAL SHIP TRACKING INTELLIGENCE

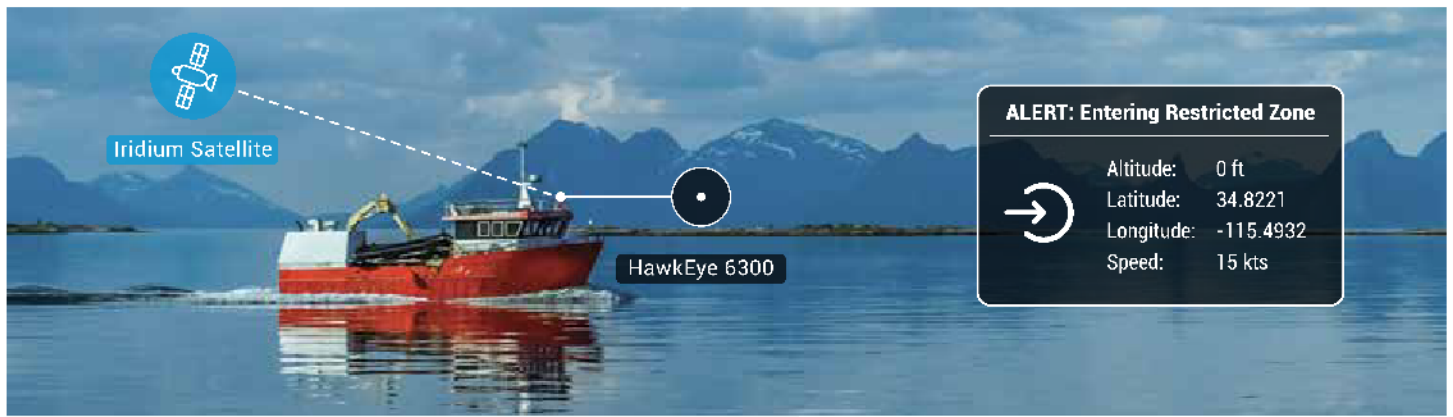

ADVANCED.

GLOBAL.

POWERFUL.

Blue Sky Network 

TRULY GLOBAL SATELLITE COMMUNICATION

Blue Sky Network is a pioneer in the development of satellite tracking and two-way voice and data communications. Our services help commercial, government, and privately held fleets working in remote areas in more than 50 countries around the world. Our state-of-the-art tracking and communication solutions leverage the Iridium satellite constellation and GSM networks (dual-mode) to seamlessly integrate with our industry-leading command center – SkyRouter™. Blue Sky Network is AS9100/ISO 9001 certified.

CONSTANT COVERAGE

In the maritime industry, monitoring the fleet and accessing real-time, worldwide voice and data communication is invaluable. Blue Sky Network's dual-mode SATCOM systems empower asset operators, enabling them to always stay in contact, while monitoring trip patterns over time.

Whether its voice calling, two-way messaging, or automatic position reporting, you can always count on Blue Sky Network for reliable global satellite communication.

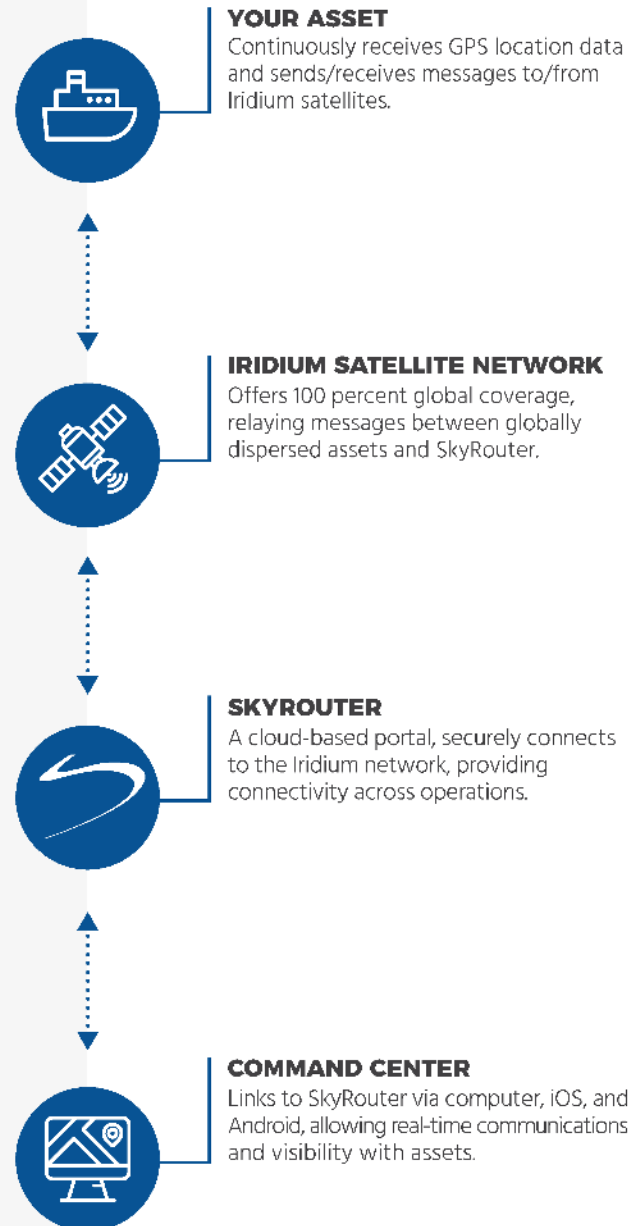

USE CASES

- ✓ **Global C4I* and MCS***
- ✓ **IUU fishing control***
- ✓ **International border protection**
- ✓ **Patrol vessel monitoring**
- ✓ **Real-time situational awareness**

* C4I: Command, Control, Communications, Computers, and Intelligence

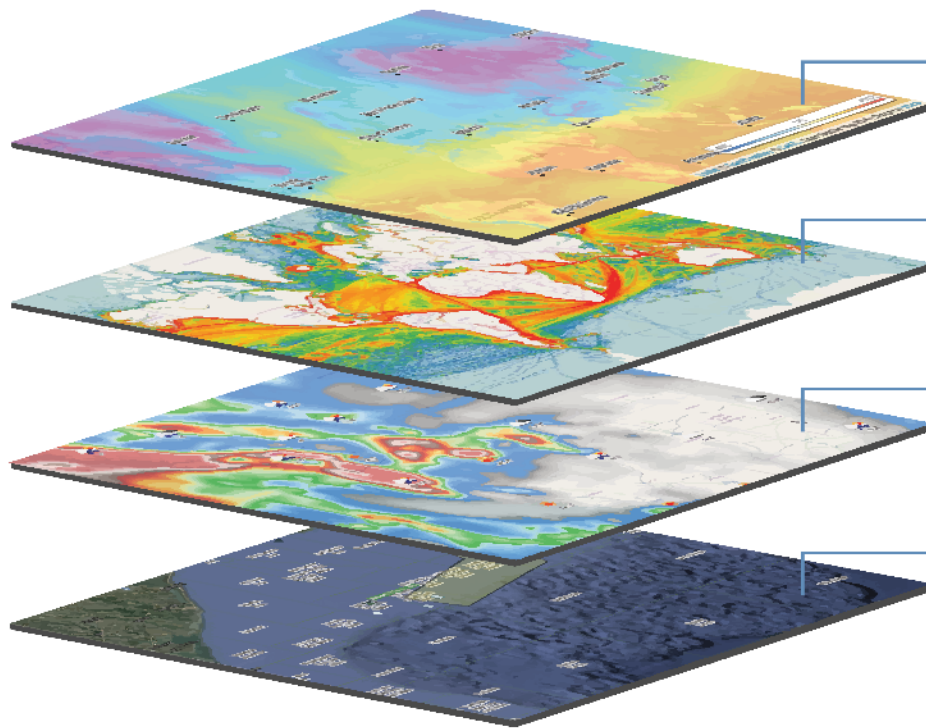

* MCS: Monitoring, Control, and Surveillance

* IUU: Illegal, Unreported, and Unregulated

DYNAMIC OVERLAY MAPPING PACKAGES

Dynamic, tailored overlay packages interactively display key data points directly on the SkyRouter maps, further enhancing situational awareness in real-time.

CUSTOM OVERLAYS

Organization-specific overlays implemented with customer-provided static or live data sources.

GLOBAL WEATHER

Improve safety and awareness with global weather overlay packages for marine environments.

SATELLITE AIS DATA

Improve fleet monitoring and operational efficiency with overlay packages from leading AIS satellites.

SKYROUTER MAP

Change ordering and opacity settings for each overlay and view multiple maps with varying overlays on one screen.

SKYROUTER

VESSEL MONITORING AND COMMUNICATIONS PLATFORM

SkyRouter is our industry-leading fleet management and analytics portal, tracking thousands of assets in more than 50 countries. Its intuitive, sophisticated, and visually engaging cloud-based platform is accessible on any Android or iOS device. For the first time ever, operations managers, dispatchers, and even your customers have the power to control all their maritime assets from their desk or pocket, in real-time. Managing your fleet has never been easier than with the SkyRouter asset management and visual analytics platform.

SKYROUTER - KEY FEATURES

Real-Time Insight

View live tracking data and vessel operations, including pole-to-pole coverage.

Open Architecture

SkyRouter provides various application program interface platforms so your data is available when you need it, in multiple convenient formats you can work with.

Interoperability

SkyRouter supports interoperability with third party agencies and systems, further centralizing your asset tracking and fleet management.

Centralized Management

Integrate data from third party Vessel Monitoring System (VMS) solutions into the SkyRouter system for centralized vessel monitoring and management.

Dynamic Event Alerting

Get notified wherever you are with SkyRouter's dynamic SMS and email alerting system.

Enhanced Maps

Innovative and customized map overlays, geofencing, weather data, and multi-screen views allow you to simultaneously track all assets and be notified of their operational environments.

BLUE SKY NETWORK

Founded in 2001, Blue Sky Network is headquartered in San Diego, California, with customers and distributors in more than 50 countries. Blue Sky Network's exceptional customer service and industry-leading solutions make us the perfect partner in achieving truly global communications and fleet management in your existing operations.
