- Iridium Tier 1 VAR
- Iridium Tier 1 VAM

The SkyRouter Command Center

Core Competencies

Blue Sky Network helped pioneer the development of satellite tracking and two-way voice and data communications for a myriad of fleets operating in remote areas around the world. Our state-of-the-art tracking and communication solutions leverage the power of the Iridium satellite constellation to seamlessly integrate with our industry-leading command center – SkyRouter™.

Development of our best-in-class solutions is driven by current and future industry requirements, and by years of valuable customer feedback. We are constantly evolving technologies to deliver innovative features such as variable-rate tracking reports, geofences, and SMS/email alerting. Best of all, our solutions can be tailor-made to fit your operational needs by our experienced engineering team.

We continue to lead the market with advanced solutions such as dual-mode (GSM-Iridium) devices, and Bluetooth-enabled hardware that, in conjunction with SkyRouter™, exploit the power of smartphones and tablets to enable bi-directional free-form or preset messages and customized forms, sent from anywhere, to anywhere.

For the past 15 years, Blue Sky Network's SkyRouter™ platform has been the industry-leading fleet management portal for real-time tracking. With custom features such as weather overlays, FAA charts, third party maps, and our dynamic event alerting system, our portal offers intelligent communications and unprecedented reliability. SkyRouter™ provides cutting-edge capabilities via an easy-to-use, intuitive platform, which can be accessed via a web browser, or via apps available on iOS and Android devices. SkyRouter™ empowers users, enabling constant contact with assets no matter where they are.

Blue Sky Network. When Experience Counts.

Blue Sky Network is an industry-leading provider of mission-critical fleet management, tracking and operational analytics solutions serving private, commercial, and government customers worldwide. Blue Sky Network deploys innovative satellite-based communication solutions that help aviation, marine, and land/mobile customers track and manage their assets in real-time in over 50 countries, resulting in improved safety, security, operational efficiency, and profitability. Blue Sky Network's interactive web portal, SkyRouter, offers extensive tracking, reporting, communication and asset management functionality using its unique and easy to use graphical interface. Founded in 2001, Blue Sky Network is headquartered in San Diego, California with customers and distributors worldwide.

Certified homologation to operate in Brazil and Russia
