IRIDIUM PTT. The Iridium PTT service is now fully functional!

For the first time ever, small groups can have light powerful, and secure world-wide communications for teams.

The power to Push-To-Talk and communicate across the globe in multiple environments and settings offers a multitude of options for organizations that are local to global. ASE has been involved from the beginning in developing solutions that make the IRIDIUM PTT network accessible from inside buildings, moving or stationery vehicles.

ASE products are designed from engagement with many professionals in the field and since the service is new, there are a great many ‘unmet needs” in the marketplace. If you can’t see what you need in the following pages, We look forward to helping you connect easily and seamlessly.

HEADQUARTERS
We are specialists in providing Docking Stations and Antenna Options in-building.

ON-THE-GO - "FLY AWAY"
Complete PTT Solutions for On-the-Go or "Fly away kits" to transform the Iridium 9575PTT into an on the go solution.

COMPLETE SOLUTIONS
Docking Stations, Dual-Mode Antennas, fittings, PTT Accessories. We have the expertise.

VEHICLES
Choose Vehicle Permanent or Temporary Solutions for your organizations needs.

IN-FIELD ON-THE-GROUND
Our solutions transform the 9575PTT Handset into a natural use case for those used to Land-Mobile Radio (LMR) options.

INTEROPERABILITY
Our solutions let you bridge the gap between Satellite Comms Land-Mobile-Radios through interoperability.
PROVIDES OFFICE/IN-BUILDING SOLUTION FOR IRIDIUM PUSH-TO-TALK (PTT)

NATURAL USE WITH PALM/SPEAKER MIC.

EXTEND USE WITH ANALOG PHONE ANYWHERE IN BUILDING (USE # KEY FOR PTT)

EASY CONNECTION TO IRIDIUM ANTENNA FOR INDOOR USE

CONNECT GPS ANTENNA (OPTIONAL USE OF GPS ANTENNA-SEE DISCUSSION)

RELIABLE ASE EQUIPMENT

ASE HEADQUARTERS PUSH-TO-TALK (PTT)
ASE-9575P-HQ

SUMMARY OF KEY FEATURES

ASE-9575P-HQ HEADQUARTERS Kit
Shown below are the components that are included with, or needed for the ASE-9575P-HQ KIT.

Antenna Solutions
Purchase separately-Antennas and cable systems for HQ applications.

Power Brick AC/DC
Reliable AC/DC Power Supply. Please specify Country Type. Included in the kit.

Office Mount
Mounting for Flexible Installation. Pedestal and RAM Mount together. Included in the kit.

rev 0.01
Do I really need a GPS Antenna for a Headquarters Installation?

**NOT REALLY**

Many people think that the GPS antenna is required for the Talk-Group coverage, but this isn’t true. Iridium has its own GPS derived from doppler on-board the satellites. The GPS for the 9575 is used for the SOS-distress button on the 9575 Handsets.

**What if I don’t use a GPS Antenna? What will happen?**

![PTT Screen with GPS antenna connected](image)

**WITH GPS ANTENNA-POSITION KNOWN**

![PTT Screen without GPS antenna](image)

**WITHOUT GPS ANTENNA-POSITION UNKNOWN**

Shown on the left is a PTT Screen that has a GPS antenna connected. Note that the distance is 232 km to the Handset that is speaking. If we disconnect the antenna, shown on the right the same PTT screen shows “Location Unknown”. The System still works fine without the GPS antenna.

**A “WORK-AROUND”--SAVE COST, STILL GET FULL FUNCTIONALITY**

Shown on the next page is a “work-around” that preserves all functionality while saving the additional cost of purchasing and installing a GPS antenna on the rooftop.
POSSIBLE “WORK-AROUND”

Keep in mind, the first thing to consider is to move the Docking Station as close to the upper floors of a building as possible and route an analog phone to where you would like the communication to occur. If this isn’t possible, shown below is a quick “work-around.

USE A INEXPENSIVE GPS ANTENNA NEAR A WINDOW.

SYSTEM SETUP

[Diagram showing system setup with labels: 8° clearance angle, 1X SMA(M) to TNC(F) extender cable, .15m (5ft) above structure, Lightning Arrester 1X ASE-LA01/02, building window, TNC(F) to TNC(M), extender cable - Iridium, TNC(F) to SMA(M), extender cable - GPS, GPS Antenna, ASE Docking Station or Fixed Station Terminal.]

PTT PACKAGES and COMPONENTS

EQUIPMENT AND SHIPPING INFORMATION

ASE-PTT-LINK - Enhancement and Expansion Accessory for the Iridium 9575 PTT Handset, RECOMMENDED FOR PUSH-TO-TALK applications. Includes PTT Link Module, Palm/Speaker Mic.

Shipping Dimensions: 12 x 12 x 3,  6 LBS (41cm x 36cm x 20cm,  2.7 kg)
ASE XLINK
Radio to Satellite

SUMMARY OF KEY FEATURES

- Connect Land-Mobile-Radios (LMR) to Iridium PTT Network
- Most Radios Supported—Contact us with your model numbers
- Connect LMR Networks anywhere in the world with Iridium Satellite
- System acts as a “portable” and quick-deploy repeater
- Can be used with any ASE PTT Dock—Field or building Installation
- Key—No “bonk” tone from the field if message is unsuccessful.

ASE AND IRIDIUM PUSH-TO-TALK (PTT)
ASE XLINK Radio-Satellite-Interoperability

COMPONENT DETAILS
Shown below are the components that ship are needed to integrate into the ASE-XLINK Solution.

Land-Mobile Radios
Donor Radio Connects directly to the Xlink.

ASE XLINK
For linking LMRs to Satellite.

ASE PTT Docking Station
Portable or In-Building Docking Stations available.
PLEASE NOTE:
Interoperability between land-mobile-radios and satellite is powerful yet complex. The solution is recommended for highly sophisticated users only.
